WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Upright: 259 mm of 40 x 40 x 4 angle, ends square.
Foot: 100 x 100 x 6 mm plate, one 11 mm anchor hole 35 mm in from two edges; weld the upright to it in the middle, square.
Top: 60 x 60 x 5 mm plate with a 9 mm hole in the middle, welded square on top of the upright.
Clip: a 90 mm pipe clip with an M8 boss, screwed onto an M8 bolt up through the top plate. The clip's band holds the pipe.
Height: pad to the bottom of the pipe 290 mm; adjust on the M8 thread if the pad is uneven.
Fit: one under the tee branch, one under the long run, one under the short drop to jet 1 (overview); M10 anchors in the pad.
Check: the pipe sits in the clip without being pushed up or down.
